Correction: Effect of ammonium chloride supplementation on urine pH and urinary fractional excretion of electrolytes in goats

In the article “Effect of ammonium chloride supplementation on urine pH and urinary fractional excretion of electrolytes in goats” (*J Am Vet Med Assoc* 2010;237:1299–1304), the reference for the statement in the right-hand column on page 1300, “Goats were anesthetized and positioned in dorsal recumbency, and a Foley^d catheter was surgically placed into the bladder as described,⁷” is incorrect. The correct reference is reference 9.
