Instructions for Completing the Log Sheet

1) The log should be completed for each dog individually. Each dog will have its own log.
2) Logs can be typed or handwritten.
3) The log should be completed for at least 2 weeks before the first visit and for 3 weeks after each visit. You will be supplied with new logs at the time of your appointments.
4) Please be sure to put your dog’s name at the top and the date when you start the log.
5) During the treatment phases of the study, when completing the logs please mark/circle if you are currently administering treatment A or treatment B.
6) If there is a delay in your visit and you need to log beyond 2 weeks, please add additional sheets (provided) and date them appropriately.
7) Report the number of regurgitation episodes your dog had for each day. A regurgitation episode would consist of a passive expulsion of material out of the mouth or into the mouth. You should record episodes as regurgitation if your dog passively expels material out of its mouth or if you see the passive expulsion followed by the dog swallowing the material again without it leaving the mouth. You can also include episodes in which you find regurgitated material that you know was produced by your dog. Each episode of expulsion should be considered a unique regurgitation episode. Please note if the regurgitation was witnessed or found.
8) Report when the regurgitation episodes occurred – what time of the day (morning, afternoon, evening, at night), if they occurred before or after a meal and which meal, or if they occurred during certain events like activity.
9) Use the guides listed below the log table to report when the regurgitation occurred in relation to meals. Mark A, B, C, or D in the table to signify how many minutes after a meal the regurgitation happened.
10) Use the guide listed below the log table to report what the regurgitation looked like (if visualized). Mark A, B, C, or D in the table to signify what the regurgitation mostly contained (food, water, saliva, mix)
11) Use the notes section to make any additional comments. You may also include additional sheets with notes if desired.
12) Please bring the completed logs with you to your appointments.
Dog Name: 

LOG: Start immediately after Visit 1 and continue for 2 weeks until medication is completed.

Medication: Treatment Solution A or B (please circle)
