

Supplementary Table S1—Qualitative exemplars of shared antibiotic prescription concerns

<u>Theme</u>	<u>Sub-Theme</u>	<u>Illustrative quote</u>
Shared antibiotic prescription concerns	Development of “superbugs”	“I think it would be terrible if all of a sudden as a society we started having all these bugs that don't have any antibiotics that would be effective for them” -MD
	Increased difficulty treating	“The infection can be harder to treat. So then that also affects what we do because sometimes we have to be extremely creative and sometimes it's very frustrating because you're not getting resolution.” -DVM
