

### Supplementary Figure S3

**Supplementary Figure S3** – The first, third, fourth and fifth row show Oxspring (0°; dorsoproximal–palmarodistal) and the second row show High Coronar (65°; dorsoproximal–palmarodistal) radiographic views of 5 forefeet of 5 horses of Group L (with laminitis) to illustrate the first measurements to test the repeatability and reliability of the software. Three human evaluators measured the same 5 radiographs, and evaluator 1 and 2 remeasured the same radiographs a second time.
