

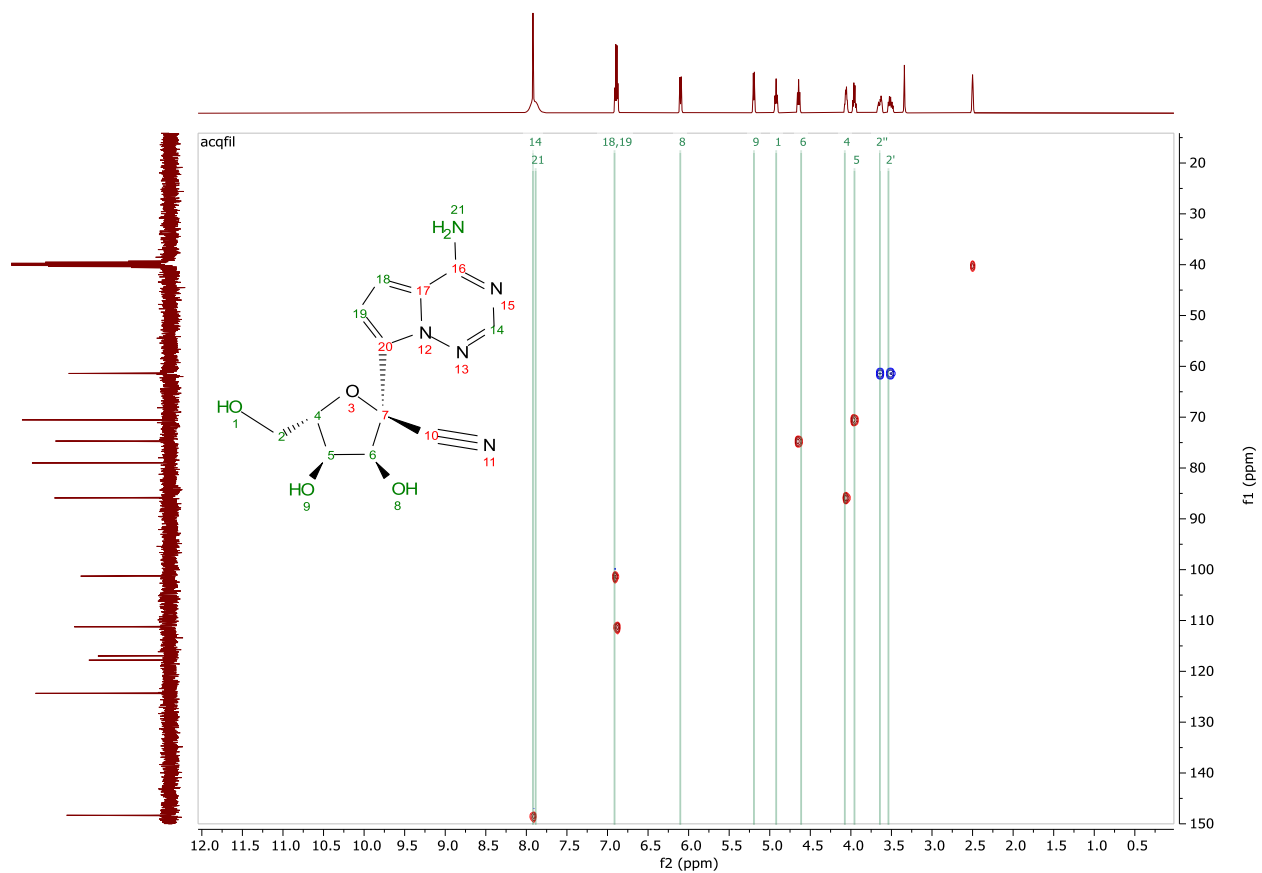

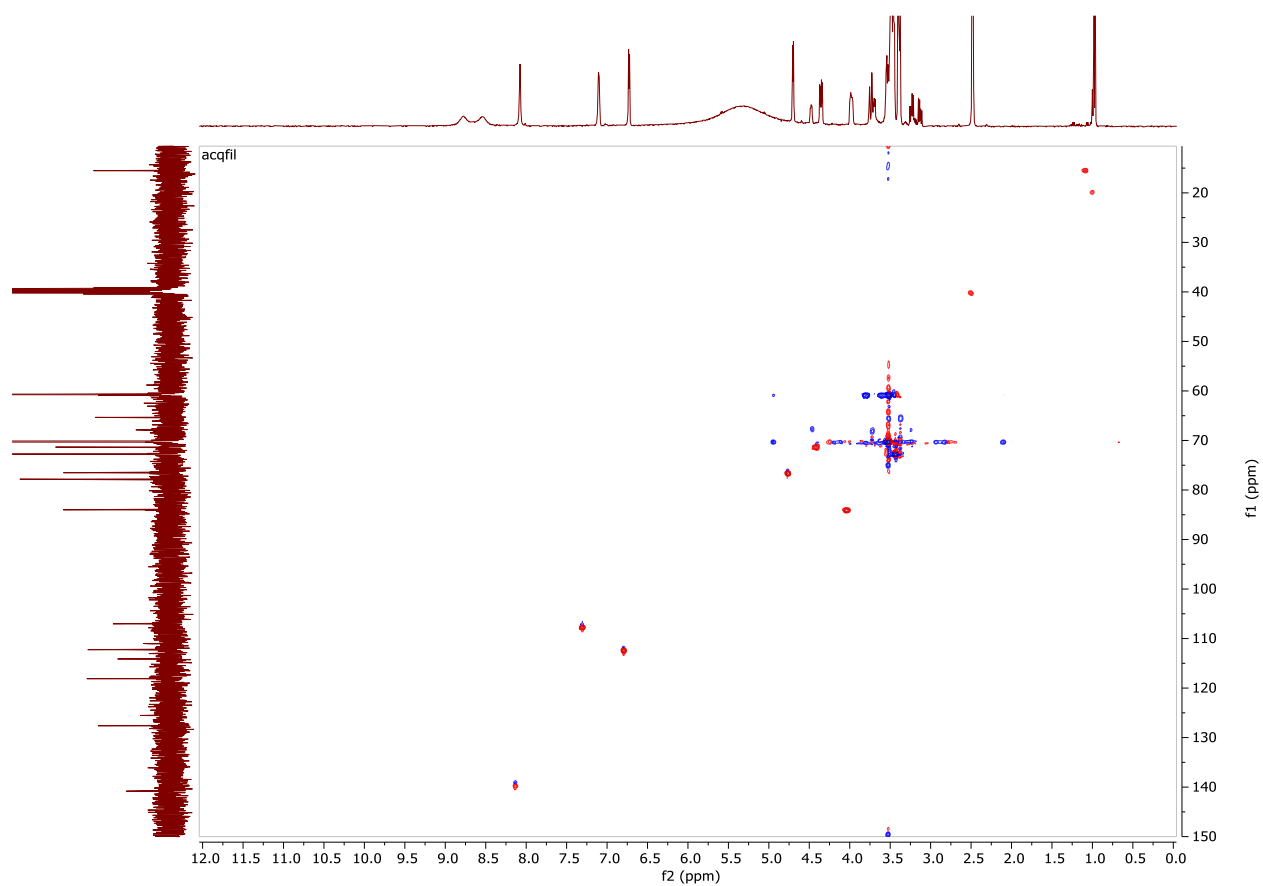

Figure S6 2D NMR of select GS-441524 vials

Heteronuclear Single Quantum Coherence (HSQC) for the positive control and the major peak purified by HPLC for Panda and Shire.

Positive control

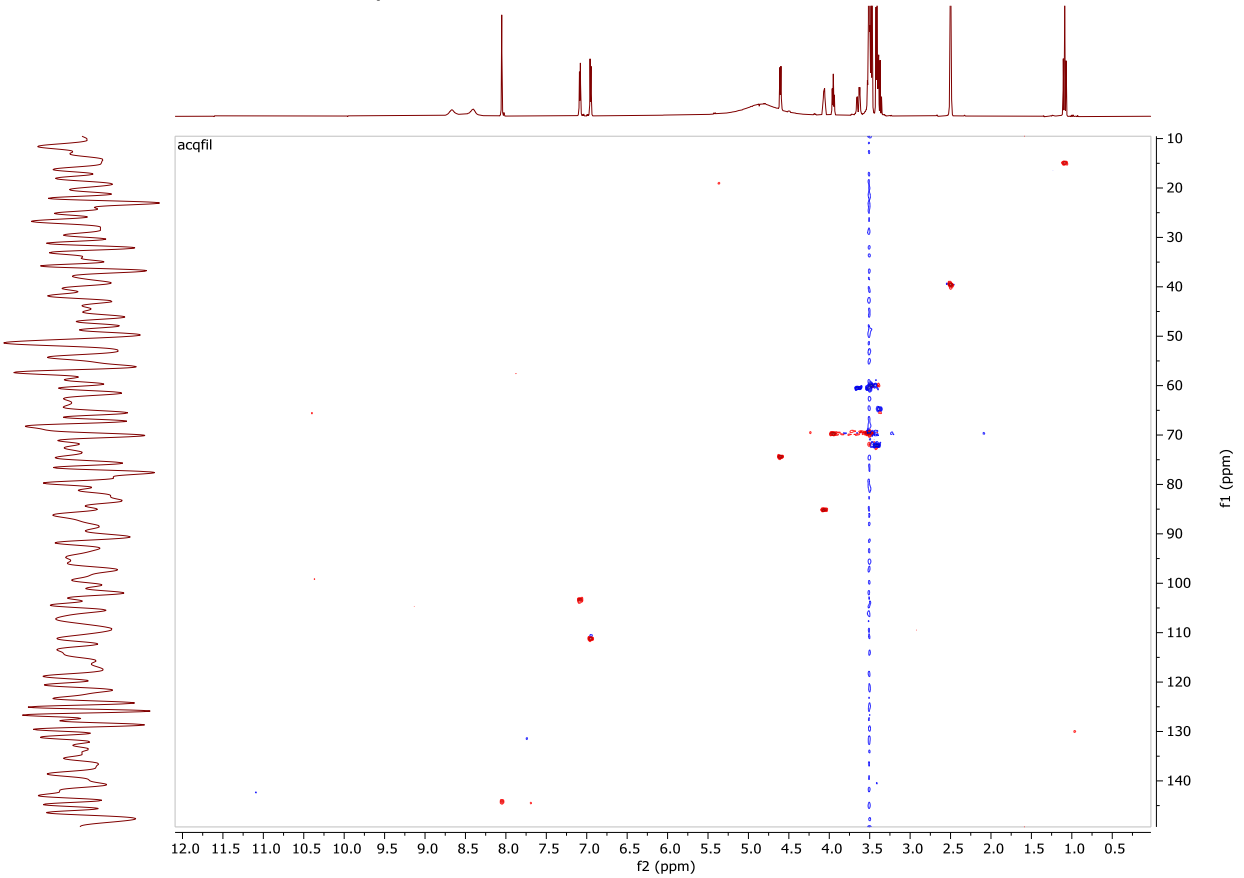

# Shire peak 1

## Panda peak 1

The sample was too dilute for a carbon NMR with baseline resolution between peaks. The internal HSQC peak is shown here.

# Side by side comparison

Positive control

Shire

Panda
