

Supplementary Table S1—Gender differences in mental health and work-related emotional outcomes for LGBTQ+ veterinary students and professionals (n = 440).

	n	Cis Male (n = 135)	Cis Female (n = 273)	Trans/Non- binary (n = 32)	
Psychological Distress	440				χ^2 (df), <i>p</i> 25.7 (2), <i>p</i> < .01*
Yes		8 (5.9%) _a	45 (16.5%) _b	13 (40.6%) _c	
No/missing		127 (94.1%) _a	228 (83.5%) _b	19 (59.4%) _c	
Have you ever had a significant problem with clinical depression?	440				14.3 (2), <i>p</i> < .01*
Yes		36 (26.7%) _a	123 (45.1%) _b	16 (50.0%) _b	
No/missing		99 (73.3%) _a	150 (54.9%) _b	16 (50.0%) _b	
Have you ever seriously considered suicide?	440				5.5 (2), <i>p</i> = .06
Yes		39 (28.9%)	98 (35.9%)	16 (50.0%)	
No/missing		96 (71.1%)	175 (64.1%)	16 (50.0%)	
Have you ever attempted suicide?	440				2.4 (2), <i>p</i> = .31
Yes		13 (9.6%)	21 (7.7%)	5 (15.6%)	
No/missing		122 (90.4%)	252 (92.3%)	27 (84.4%)	

Notes. Subscripts reflect results of z tests across columns using Bonferroni correction for categorical variables. If a pair of values is significantly different, the values have different subscript letters assigned to them. *Statistically significant after accounting for Type I error with the Benjamini and Hochberg Linear Step-up Approach.⁴⁸
