Supplementary Figure S1—Suggested sign or handout for use in safety education of visitors entering animal areas of petting zoos or other exhibits.

All animals can carry germs that make people sick.

Some people are more likely to get sick: babies, toddlers, pregnant women, older adults, and those with weakened immune systems.

Stay Healthy:

➡️ No food, drinks, baby bottles, pacifiers, toys, or strollers in animal areas.

➡️ Watch kids & those with intellectual disabilities around animals.

➡️ Make sure kids don’t put their fingers or other things in their mouths.

➡️ Wash hands with soap & water right after visiting the animals.

Stop germs!
